**SUBJECT: WMD**

I met with George Tenet on April 15 in the Sit Room. We agreed that Wolfowitz and McLaughlin would put together a list of top time-sensitive-targets for WMD—specifically, such things as the mobile biological labs and the nuclear scientists.

We need to have that list finalized by tomorrow, April 16.

We need to assign people to work on them and press to find the kinds of people who can help us get those targets and the documentation.
